

## Release note for Noble NB4 Pro transmitter firmware/Noble NB4 Pro 软件版本更新记录

Software version 软件版本	1.0.2	Date 日期	08/2022
--------------------------	-------	------------	---------

- ▶ **新增功能：**
  - SVC 功能菜单里新增高级功能（以适配 INr4-GYB 接收机使用）。
  - 发射机打包的接收机固件里新增 INr4-GYB 接收机固件。
- ▶ **修改功能：**
  - 更新了发射机里所有打包的接收机固件（即 FGr4、FGr4B、FGr4S、FGr4P、FGr8B、FGr12B、INr4-GYB 和 MiniZRF3 接收机）。建议更新完发射机固件后，同步更新接收机固件。
- ▶ **特殊变化：**
  - 无

### 注意事项

- 更新完成后模型数据会被复位，建议提前通过遥控管家进行数据备份，然后导入该版本使用。
- 发射机和接收机更新完成后需要重新对码。
- SVC 中的高级功能需要搭配 INr4-GYB 接收机才能正常使用。

- 
- ▶ **New functions:**
    - Add advanced functions to the **SVC** function menu to adapt to INr4-GYB receiver.
    - Add INr4-GYB receiver firmware to the receiver firmwares packaged by the transmitter.
  - ▶ **Modified functions:**
    - Upgrade all packaged receiver firmwares in the transmitter (i.e. FGr4, FGr4B, FGr4S, FGr4P, FGr8B, FGr12B, INr4-GYB and MiniZRF3 receivers). It is recommended to update the receiver firmware synchronously after updating the transmitter firmware.
  - ▶ **Special changes:**
    - None

### Notes

- The model data is reset after the update is finished. It is recommended to back up data by the **FlySkyAssistant**, and then import the data after the update is finished.
- The transmitter and the receiver need to be rebound after the update is finished.
- The advanced functions in SVC can be used with INr4-GYB receiver which has a built-in gyroscope.
