基站附近或其他无线
电话跃的地方

人多的地方或道路附
近

有客船的水域

高压电线或通信广播
天线附近

- 当你感到疲倦、不舒服，或在摄入酒精或服食导致麻醉或兴奋的药物后，不要操作本产品，否则可能对自己或他人造成严重的伤害。
- 2.4GHz 无线电波段完全不同于之前所使用的低频无线电波段。使用时请确保模型产品在您的视线范围内飞行，大的障碍物将会阻断无线电频率信号从而导致遥控失灵模型失控。
- 在使用过程中，严禁紧握发射机天线，否则将会大大减弱无线电传播信号的质量和强度，导致遥控失灵模型失控。
- 在操作或使用模型后，请勿触摸任何可能发热的部位，如发动机、电机、定速设定等。这些部件可能非常热，容易造成严重的烧伤。
- 遥控设备使用不恰当可能导致操作者或他人严重受伤，甚至死亡。为保证您和设备的安全，请仔细阅读使用说明书并按照规定要求进行操作。
- 使用前必须确保本产品与模型安装正确，否则可能导致模型发生严重损坏。

- Do not use the product at night or during bad weather conditions, like rain or thunderstorms. It can cause erratic operation or loss of control.
- Do not use the product when visibility is limited.
- Do not use the product in rain or snow. Any exposure to moisture (water or snow) may cause erratic operation or loss of control.
- Interference may cause loss of control. To ensure the safety of you and others, do not operate in the following places:

Near any site where other radio control activity may occur

Near people or roads

On any pond/lake when passenger boats are present

Near power lines or communication broadcasting antennas

- Do not use this product when you are tired, uncomfortable, or under the influence of alcohol or drugs. Doing so may cause serious injury to yourself or others.
- The 2.4GHz radio band is limited to line of sight. Always keep your model in sight as a large object can block the RF signal and lead to loss of control.
- Never grip the transmitter antenna during operation. It significantly degrades signal quality and strength and may cause loss of control.
- Do not touch any part of the model that may generate heat during operation, or immediately after use. The engine, motor or speed control, may be very hot and can cause serious burns.
- Misuse of this product may lead to serious injury or death. To ensure the safety of you and your equipment, read this manual and follow the instructions.
- Make sure the product is properly installed in your model. Failure to do so may result in serious injury.
- Make sure to disconnect the receiver battery before turning off the transmitter. Failure to do so may lead to unintended operation and cause an accident.
- Ensure that all motors operate in the correct direction. If not, adjust the direction first.
- Make sure the model stays within the transmitters range. Otherwise, it would cause loss of control.

- Replace the battery compartment cover.

► Power On

- Make sure that the receiver is powered off and correctly installed with a fully charged battery.
- Toggle the power switch to its upward position.
- Connect the receivers' power supply.

⚠ Misuse of this product may lead to serious injury or death. To ensure the safety of you and your equipment.

► Power off

- Disconnect the receiver power.
- Toggle the transmitter's power switch to its low position.

⚠ Make sure to disconnect the receiver's power before turning off the transmitter. If you turn off the transmitter forcefully, it may lead to unintended operation and cause an accident.

► Bind with Receiver

The transmitter and receiver have been pre-bound before delivery. If you are using another transmitter or receiver, follow the steps below to bind the transmitter and receiver:

- Connect the supplied bind cable to the BAT port on the receiver.
- Insert power into any other port. If the receiver has successfully entered bind mode the LED will begin flashing quickly.
- Hold the bind key while powering on the transmitter to enter bind mode.
 - If the LED on the receiver starts flashing slowly it means that the receiver has exited bind mode.
- Turn the transmitter off and on again.
- Remove the power and bind cable from the receiver. Then connect the power cable to the BAT port.
 - If the TX and RX have successfully bound, the RX's LED will be solid red.
- Check to make sure the servos operate as expected. If anything does not work as expected, restart this procedure from the beginning.

⚠ This procedure only applies to the FS-A6 receiver, different receivers may require different steps to complete the binding process.
